**IBM**

# IBM: Federation

IBM allows IBM Cloud customers to incorporate IBMid authentication to their organizations identity provider. This allows the organizations identity provider to handle all the users leveraging IBM web applications and cloud services. As a result, Company X can use their own login page and security controls to secure access to IBM Cloud Apps or IBM Services.

# How to Un-Federate Individual Users

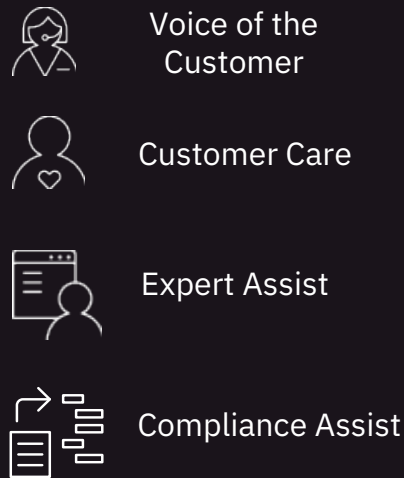

1. **Email:** User or administrator sends email to: [ibmidfd@us.ibm.com](mailto:ibmidfd@us.ibm.com)
2. **Subject:** Request for Un-Federation
3. **Body:** Please disable federation for the following email address(es) pertaining to the federated domain “xxx.com” (or xxx.es, etc.)  
*Once invoked this process will conclude with a confirmation email.*
4. **Alert:** If an alert to your IBM Cloud administration is desired anytime an un-federation request is received please send your distribution to be cc'd to: [ibmidfd@us.ibm.com](mailto:ibmidfd@us.ibm.com)
